

Figure 4.1-1

Temporal Trend of 7-Day Average Total PCB Concentration at the Thompson Island Far-Field Station

Notes: Updated bias correction factors were applied to Peaks 5, 8 and 14 for modified Green Bay Method and Total PCBs were recalculated. Used data analyzed by modified Green Bay method whenever available. Non-detects set to 1/2 MDL. Duplicate data averaged.

Phase 1 Evaluation Report
General Electric Company

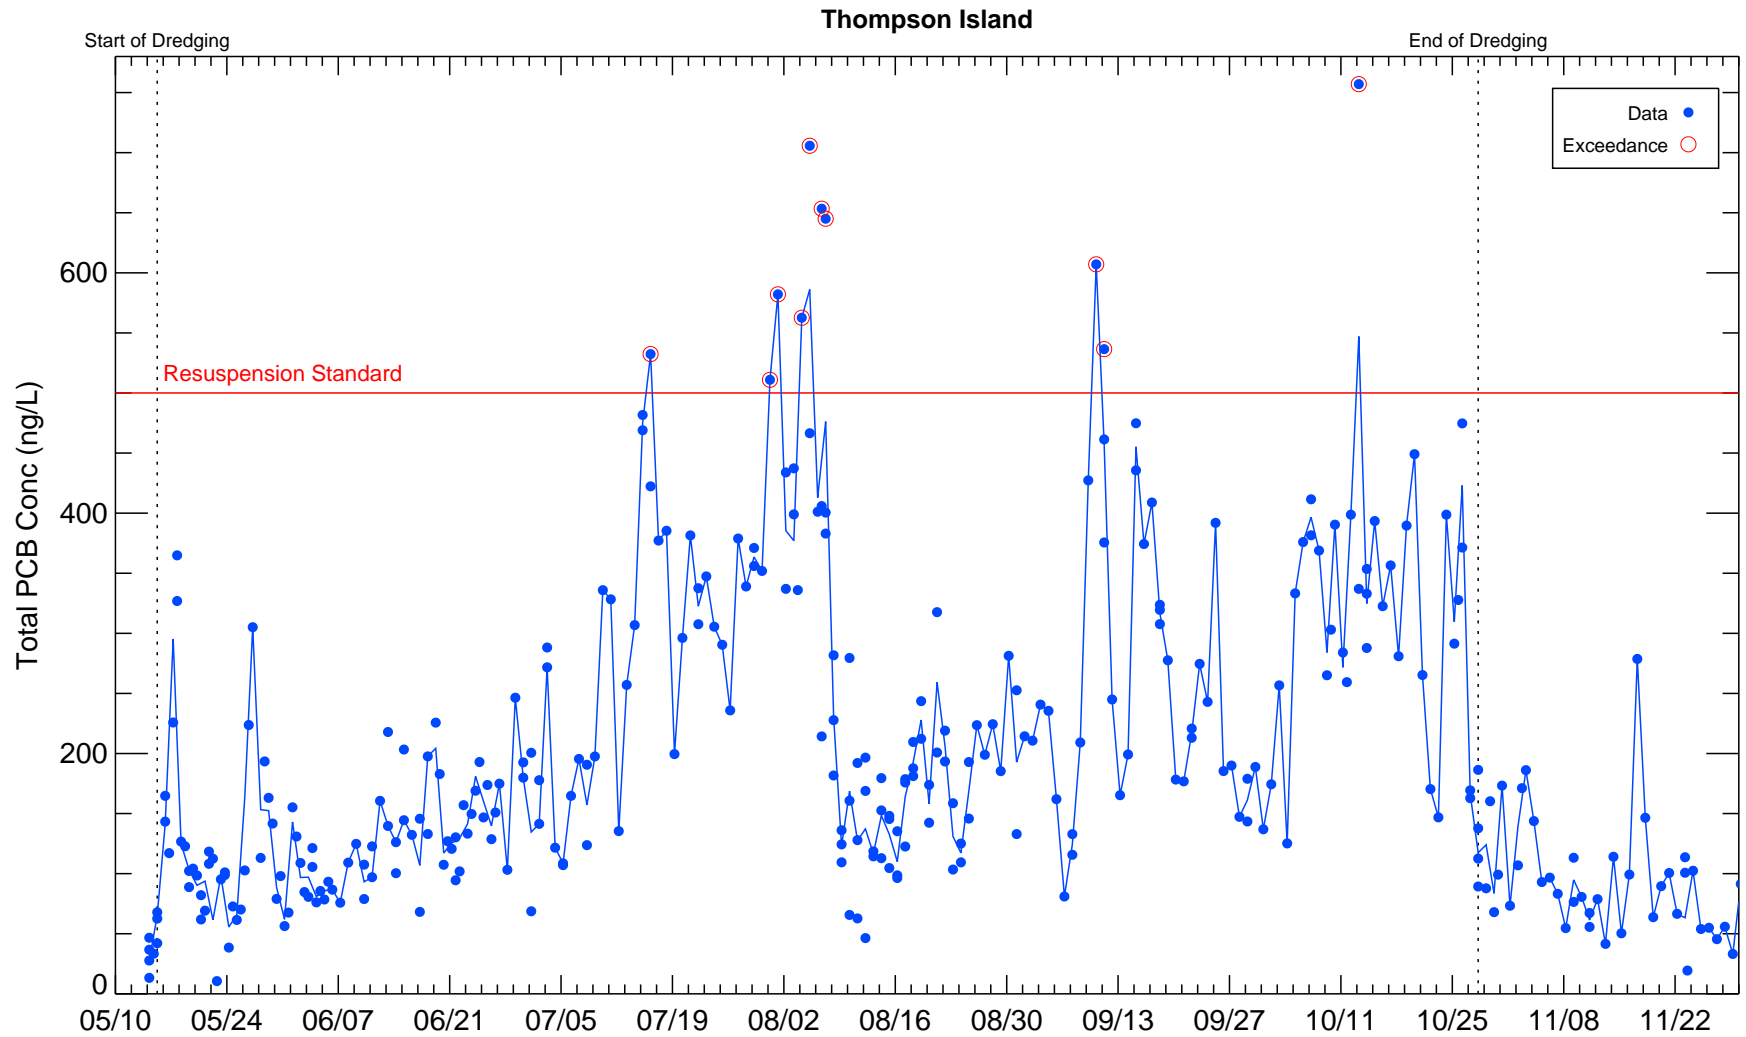

Figure 4.1-2
 Temporal Trend of Total PCB Concentration at the Thompson Island Far-Field Station

Notes: Updated bias correction factors were applied to Peaks 5, 8 and 14 for modified Green Bay Method and Total PCBs were recalculated. Used data analyzed by modified Green Bay method whenever available. Non-detects set to 1/2 MDL. Daily average PCBs plotted as line.

Thompson Island

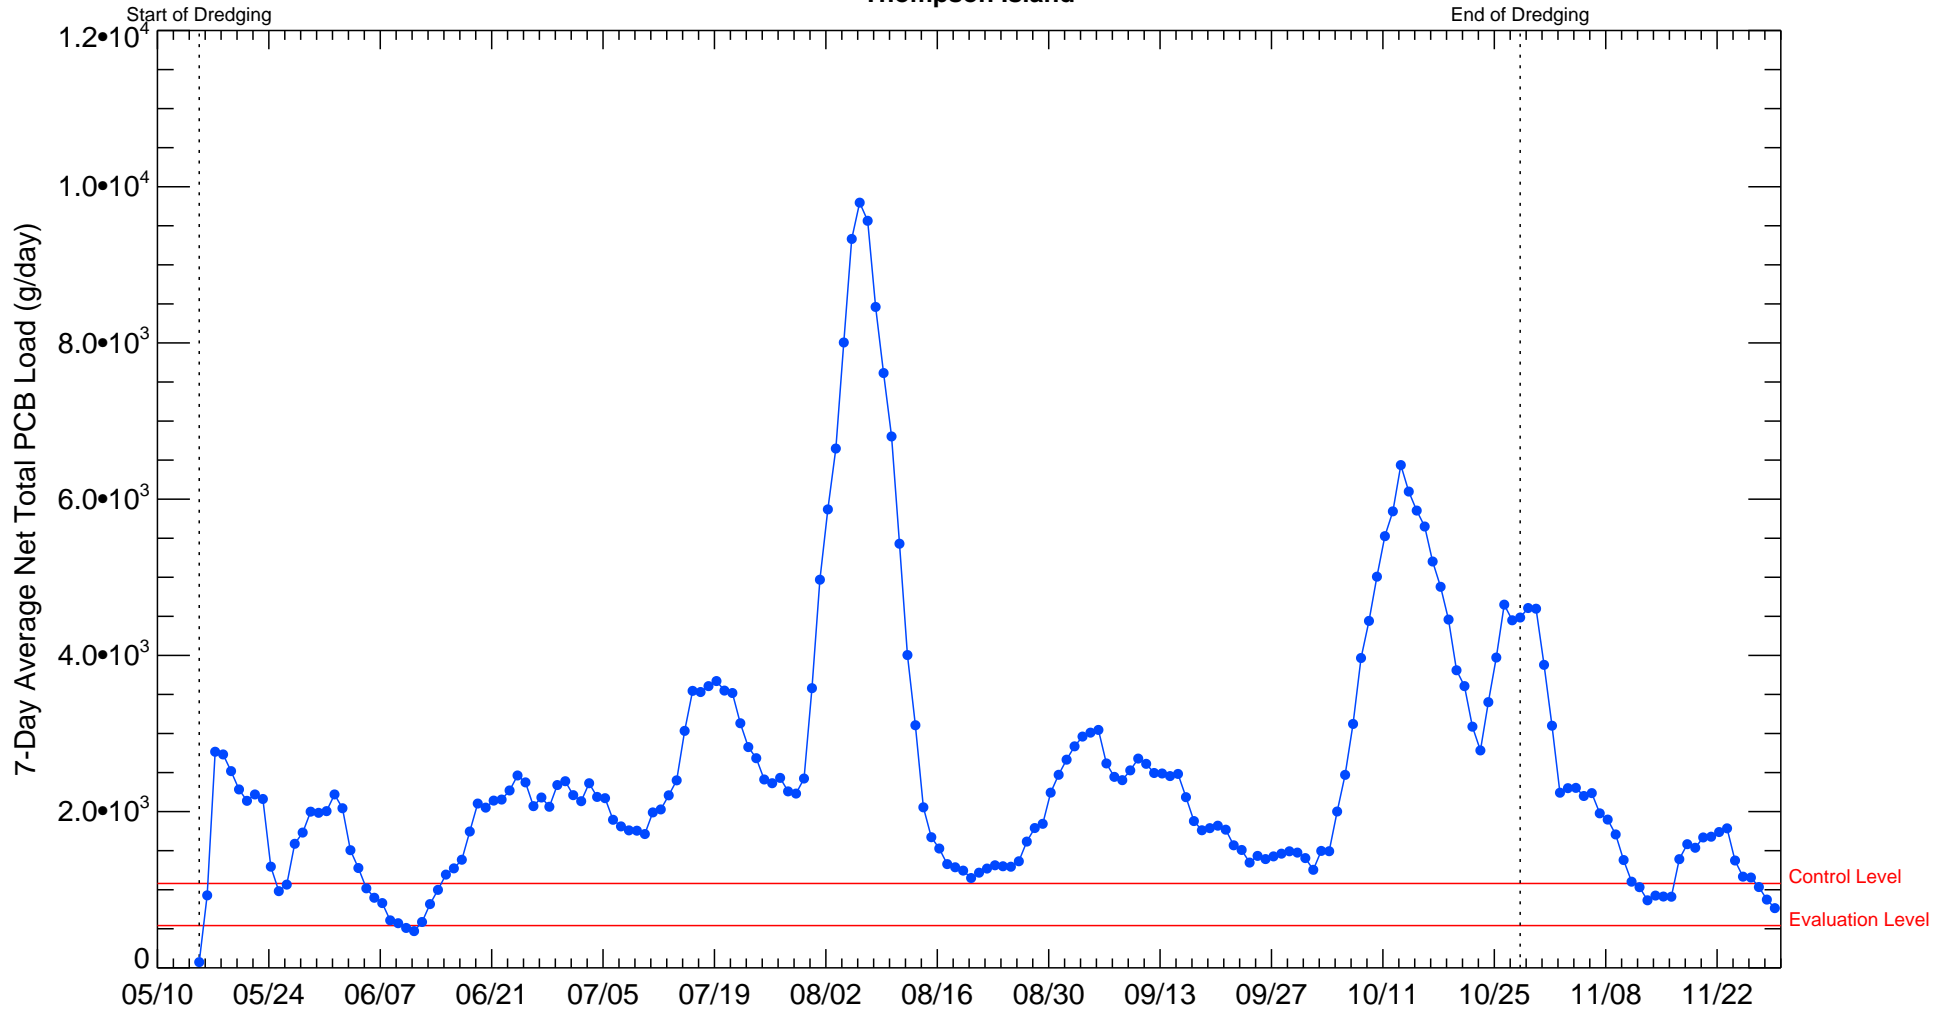

Figure 4.1-3

Temporal Trend of 7-Day Average Net Total PCB Load at the Thompson Island Far-Field Station

Notes: Updated bias correction factors were applied to Peaks 5, 8 and 14 for modified Green Bay Method and Total PCBs were recalculated. Used data analyzed by modified Green Bay method whenever available. Non-detects set to 1/2 MDL. Duplicate data averaged.
